

Created the Digital Edge for a Corporate Legal Management Solution

The client is a pioneer in helping corporate legal departments and risk departments streamline operations, manage costs, plan budgets and conduct complex performance analysis.

In order to create a digital edge for their enterprise platform, the client engagement had OFS to mobile enable some of the features like review and approval of budgets, invoices and accruals by the executives who want to perform these tasks on the move.

Business Impact:

- Increased revenue through upselling
- Created better brand visibility against competitors who were laggards in developing a digital edge.
- Increased adoption among executive users of the application

Key Highlights

- Developed a hybrid solution that was compatible across all major mobile platforms – Apple, Android, Windows and Blackberry
- Designed platform specific UI interface that leveraged the benefits of the different UI paradigms
- Secure communication established to interface with existing service

Technologies

- HTML 5, CSS, jQuery, .NET and JavaScript
